SPECIAL OFFERING

High-Grade Suits.

Direct importations for spring wear. These goods are of the very latest cut, tailored equal to custom-made goods, are well worth \$12 to \$15 a suit. Our opening price,

\$9.00

PER SUIT.

White Front Stores

THE YEAR'S WORK.

Hundred Thousand Club Meeting.

REPORT OF PRESIDENT LEBENBY

A Resume of What Has Been Done.

New Executive Committee Selected.

The regular annual meeting of the Hundred Thousand Club was held at the city hall last night. After the reading of the minutes of the previous meeting of the executive committee the following were elected members of the club: Dr. J. W. A. Washburn, W. F. Forney, Dr. C. J. Miner, Horace Hawes, George L. Warren and T. C. White.

After transacting some routine business the executive committee adjourned and the club was called to order by Chairman Lebenby, who read the following interesting report as chairman of the executive committee:

"This being the close of our first year, I presume it is expected of me to make a brief statement of what we have accomplished since our organization, and I will not burden you with listening to a reading of our articles of incorporation, but I will call your attention to the first paragraph of the articles, which I believe fully expresses our purpose: 'The object of this club is primarily to increase the population of Fresno county to 100,000 before the first day of June, in the year 1900.'"

"I believe the club has had this object in view, and labored faithfully to attain this and since its organization it has held two regular meetings at a recent meeting at which we were addressed by representative men of the city, one gentleman, laboring under a wrong impression, suggested that the club was not doing much for the city, and I believe do not to any considerable extent, I would therefore suggest that our plan of action be carried out. It should be thoroughly and completely understood that this club has no selfish motive, no particular locality to boost, but the welfare of the whole county is in view."

"When your attention is called to the fact that fifty regular meetings (exclusive of numerous special and committee meetings) have been held since the year, I think I may be pardoned in saying that our zeal is commendable. A brief synopsis of what we have done I hope will not prove uninteresting."

"Our first regular meeting was held on the 18th day of March, 1895, and at that meeting a committee of five was appointed to confer with a similar committee appointed by the Chamber of Commerce for the purpose of securing suitable resolutions favorable to the proposed San Joaquin Valley railroad."

"This committee performed their duty, thus putting the club on record in favor of this important undertaking. At the same time Mr. Barnard secured much of the success of the club in its first year to the efforts of the president. The new executive committee was then chosen by ballot, and the following are its members: President, A. V. Lebenby; vice-president, William Glass; treasurer, E. F. Barnard; secretary, L. S. Spencer."

"Mr. Eastwood and S. N. Griffith briefly addressed the club on the future in store for Fresno considering the vast resources which the county possesses. Mr. Eastwood pointed out the many advantages of the great city of the United States, has been built up chiefly through her water power. Fresno may be a great city with opportunities for the future, and the club is endeavoring to secure the water power. Fresno may be a great city with opportunities for the future, and the club is endeavoring to secure the water power. Fresno may be a great city with opportunities for the future, and the club is endeavoring to secure the water power."

"At a meeting on March 27th A. L. Hobbs was appointed a committee to represent us at a meeting of delegates from the northern and central portions of the state to be held in San Francisco, California, for the purpose of formulating plans looking toward inducing immigration to California. That he performed that duty to our satisfaction I think you will all agree."

"In the early part of the year it was the expression of the club that something in the way of permanent advertising matter be published for distribution. This was done by the club, and the same was appointed and assigned different subjects upon which to prepare articles; many of them reported, advancing some excellent ideas. I would suggest that this matter be not lost sight of, and that some time during the coming year it be resumed."

"Looking to an increased population for the city, and that we might have better and more complete sanitary and police protection, the club at a meeting held in May last adopted a resolution asking the voters of several adjacent cities to become part of the city, and I am pleased to say that the indications are favorable toward the consummation of our plan. Let us further encourage the proposition."

"We have not been unmindful of our patriotic duty, as demonstrated by the observance of our greatest national holiday, July 4th. The club, with its usual energy, taking upon itself the responsibility of securing an appropriate celebration, and with the assistance of a committee from other organizations, demonstrated that it had not forgotten how to celebrate. The club was represented in the procession by an appropriate float of unique design."

"The club has been found on the right side of all public improvement. We have urged and I think not without some effect the completion of the high school building, and the attention of our representatives in congress to the necessity of provision in the way of public buildings for Fresno, and I am pleased to say that all our appeals in this direction have been most favorably received. Let us have taken up the matter of improvement of our cemetery, and I am assured that our efforts are being appreciated, and that already arrangements have been made for the permanent improvement of portions of that most sacred ground."

"Referring again to the main purpose of our organization, viz, the increase of population, I find that the efforts are being made by the club for the purpose of increasing the population of Fresno in different parts of the county, at the suggestion of our club, and that we are assured of the success of this undertaking."

"I have not lost sight of the importance of the Nicaragua canal, having memorialized congress on this proposition of national importance. We have urged the inauguration of a citrus fair, both by moral support and appropriation of cash premiums. Recognizing the vast importance of the new canal."

Awarded Highest Honors—World's Fair, Gold Medal, Midwinter Fair.

Most Perfect Made, 40 Years the Standard.

terprise, the San Joaquin Valley Electric Light and Power Company, we have taken steps, by the appointment of a suitable committee, to prepare and celebrate the day of its completion. Of the time and place you will be fully advised in due season."

"I should not feel that I had done my duty without calling attention to the amount of advertising of the vast resources of this county this club has done. We arranged for and carried to a successful completion a special edition of the Daily Republican, of 2500 copies, extra, on April 10th. On May 20th we prepared a special folder containing useful and truthful information of our resources. In November we inserted standing advertisements in the New York World, Harper's Weekly, the Chicago Inter-Ocean and the St. Louis Globe-Democrat. On this date we also ordered a second edition of 10,000 copies of our folder."

"We have circulated 500 copies of the holiday edition of the Daily Republican, also the same number of the holiday edition of the Daily Republican. We have distributed 10,000 copies of the folder of different issues, and also have an advertisement in the Chicago Inter-Ocean, and in two of the leading papers of Florida. When it is taken into consideration that our resources are only 30 cents per month from each member of the club, I feel confident that you will bear me out in saying that our money has been judiciously handled."

"Asking your cooperation, that same support and consideration you have given me, I am, gentlemen, yours truly, A. V. Lebenby, President."

Treasurer E. F. Barnard reported as follows: Receipts for year, \$971.15; disbursements, \$736.80; balance on hand, \$175.15.

The club then proceeded to elect an executive committee for the ensuing year, and the following were elected: John McMillin, John D. Gray, C. Chisholm, T. G. Hart, L. A. Spencer, F. J. Hagar, G. S. Ramsey, A. V. Lebenby, E. F. Barnard, E. C. Dunn, W. B. Good, J. W. Shanks, L. A. Hobbs, C. T. Cleary, J. F. Church, J. Seymour, J. S. Eastwood, George Roeding, Jacob Clark and Dr. W. A. Washburn.

In motion of E. F. Barnard a vote of thanks was tendered President Lebenby for his services to the club during the past year. Mr. Lebenby has been an untiring worker during that time and Mr. Barnard secured much of the success of the club in its first year to the efforts of the president. The new executive committee was then chosen by ballot, and the following are its members: President, A. V. Lebenby; vice-president, William Glass; treasurer, E. F. Barnard; secretary, L. S. Spencer."

"The ladies of the South Methodist church gave a social on Tuesday evening at the home of Mr. and Mrs. Wick D. Parsons. The evening was pleasantly spent in games and sociability, much amusement being afforded by a '20' test affair. Refreshments were served."

More Cemetery Improvement.

The fraternal societies of Fresno are coming forward with commendable spirit in the line of cemetery improvement. The Hermann Sons have appropriated \$30 for that purpose, and nearly every similar organization in Fresno is taking similar steps in the same direction.

Wood Cutting Cases.

In Commissioner Prince's court yesterday the examinations of L. A. Brown and J. D. Brown were concluded. A decision is expected tomorrow. Frank Pearce was held to appear in Los Angeles.

A Pointer for 'Arkansas'.

Sixty dollars for a duplicate of an iron column in the Fresno court house, formerly costing \$100, is an instance of contracting prices since the fall of silver in '73. Only that and nothing more.

The Labor Exchange will meet at DeWitt hall on Saturday, March 14th, at 2 o'clock. The object of the meeting is to adopt by-laws and perfect the organization. Friends of the movement are earnestly requested to be present.

SALT LAKE TO LOS ANGELES.

Railroad to be constructed by Eastern Capitalists. SALT LAKE, March 11.—The Utah Company, with George Q. Cannon, Wilford Woodruff and eastern capitalists as the promoters, propose to construct a railroad from this city to Los Angeles. The road will be called the Utah and Pacific, and it is announced that eastern capitalists have decided to take the line to make a grant of Pioneer square for depot purposes in this city, to take effect when 100 miles of road have been completed. The city council tonight granted the facilities asked for by a unanimous vote.

INSURGENTS REPULSED.

President of the Cuban Government Seriously Hurt. HAVANA, March 11.—The insurgents have attacked the village of Pinar, province of Pinar del Rio, and were repulsed with considerable loss. In the recent attack made by the insurgents on Sagua Tanamo, the president of the Cuban government, the Marquis of San Luis, fell from his horse and was seriously hurt. He is 76 years of age.

Cable Road Sale Postponed.

SAN DIEGO, March 11.—The auction sale of the long disused cable road was well attended by curious people today, but there were no bidders and the sale was postponed indefinitely.

Rhode Island Democrats.

PROVIDENCE, March 11.—The Rhode Island Democratic state convention today nominated for governor George Littlefield and for lieutenant governor Augustus S. Miller.

Condition of the Treasury.

WASHINGTON, March 11.—Today's statement of the condition of the treasury showed: Available cash balance, \$202,823,203; gold reserve, \$126,589,063.

What We Have Now.

"We have no great murder trials now," he said as he threw down the newspaper.

"Why, John, there have been a whole lot of them in the last year," she protested.

"You're mistaken, my dear," he asserted. "We have had a lot of minor murder trials, but no great ones. There have been some very sensational murders."

"And the murderers have been tried," she interrupted.

"True," he admitted, "they have been tried—for insanity, not for murder. I didn't say that we had not had any great insanity trials, you know."—Chicago Post.

The Largest Pumping Engine.

The largest pumping engine ever made in the United States was placed in the Philadelphia waterworks in 1892. It is 85 feet high and occupies a floor space 30 by 40 feet. The total weight of this giant machine is 475 tons, without the base plates and foundation strips, and it pumps 20,000 gallons of water every 24 hours.

PERSONAL.

A. K. Funk is over from Sanger. M. Theo Kearney is at the Hughes. E. Kreyenlingen of Hiram is in town. Charles Swanson of Firebaugh is in town.

Mr. and Mrs. J. A. Bell of Laguna are visiting in Fresno. Mrs. Peter Yung is visiting her parents in Stockton. George X. Wendling, a lumber dealer of Hanford, is in town.

Mrs. J. S. Manley of Fowler is visiting friends in this city. Mr. and Mrs. F. S. Glasgow came up yesterday from Fowler. George H. Smith and wife of Modesto are at the Grand Central.

Constable John Albin is home from a trip to his mine in Temperance Flat. W. J. Deater of Modesto is in this city looking after his newspaper interests. J. E. Chapin of Casco, Modesto, is on a business trip in this city. John McMillin is in Stockton on business. He will return in a few days.

J. A. Stroud of Selma has returned from a business trip to Southern California. W. B. Good and James A. Burns, attorneys from Selma, were in the county seat yesterday. Mr. and Mrs. Bonnell have returned to their old home after a stay of several months in Los Angeles.

Constable Warren Hill of Sanger was among yesterday's visitors in this city. He is an enthusiastic bicyclist and can now ride across a bridge without falling into the water.

The following persons left yesterday for Visalia to attend the trial of Sanchez in that town: Deputy Marshal R. T. Alford, H. J. Praxett of Visalia, L. A. Brown, John McMan and Mark Peters.

J. M. Collier and W. B. Holland will leave tonight on a trip to the electric power house on the San Joaquin river. Mr. Collier will go by team and Mr. Holland on a bicycle. They expect to return next Saturday.

A Free Lecture.

There will be a free lecture at DeWitt hall on Friday evening, by C. A. Phelps of Colorado; subject, 'The Garden of Eden.' The student account of the fall of man, examined in the light of modern criticism. The former members of Unity Society are cordially invited to attend.

Enjoyable Social.

The ladies of the South Methodist church gave a social on Tuesday evening at the home of Mr. and Mrs. Wick D. Parsons. The evening was pleasantly spent in games and sociability, much amusement being afforded by a '20' test affair. Refreshments were served.

When we next hear the question asked, 'What shall we do with our boys?' we shall answer, 'Make them literary agents.' All you want is a little room in a central situation, pen and ink and a lady typewriter. Capital to quite unnecessary, for if the agent is not absolutely destitute of wit the files soon walk into his parlor. How does he tempt them? Nothing out of the slough. In an age of publicity nothing is easier than the interview, and after a few paragraphs he is at the wheel. The newspaper is shared the fate of emperors and actresses, and is interviewed, either in the Daily Chronicle or The Bookman, both of which journals devote much space to the chronicle of small beer.

The interviewer naturally begins by saying that there are few men better known than the agent, and proceeds to describe his servant, and his maid, and his ox, and his hen, and his personal appearance with the minutest which the British public expects in an interview. 'My authors' are then touched upon, and the agent modestly says that they came to him unsought, unasked, and unbidden. 'You would be surprised if I gave you the names of one or two,' and so on and so on. Then a note is handed in, and the agent modestly says that he has a few private letters. A few days later the files arrive, their manuscripts in one pocket, their preliminary fees in the other. —National Review.

Destiny of 'Charivari.'

It is stated that this word is found in French in the fourteenth century, and references are made to Littere. I have no means of referring to Littere, but desire to indicate the use of the words 'charivari' by Gower. I give the complete sentences from the prologue to the 'Confessio Amantis':

For if men take in holy chivalry
Between the words that they wish to
There is a full great difference.
They preach us to the audience.
For al is but a chery feire.
This wordes good, so us they telle.
Also they say that some sime is due,
And thilke us therefore sime is due.
That wiked is, and do the good.

The late Professor Henry Morley, in the 'Charivari' edition of the 'Confessio Amantis' (1889, page 50), simply gives 'charivari' as the equivalent of 'cherry fair.' Is this the form in which the expression occurs in early French? If so, it would seem that this puzzling word should yield its secret to persistent investigation on the part of French scholars, though there are two vowels in the word instead of one. —Notes and Queries.

This Skinned Strangler.

It has often been questioned why orange growers will graft and plant varieties with thick skins when the great public appreciates a thin skinned orange more highly. Asking a grower, if not one of the secrets of the orange growing trade, why this was thus, he replied that the thin skinned kinds were rarely as productive as the thick skinned ones—that the public would give no more for a box of thin skins than for a box of thick ones—and that there was consequently more profit in growing orange skins than in growing orange flesh the skins carried the day.

We have never heard such an explanation before, and this may be only 'chaff.' Still, the great question remains, Why do orange growers graft and plant thick skinned sorts when the thin skins are preferable? —Mechanics Monthly.

Boston's Public Library.

In Boston, at least, is a public library where the eye may share its pleasure with the mind and the ear its pleasure with the eye. The library is a place for which, with us, the opportunity is still far too meager. We have had no public buildings have been the deplorable issues of inexperience and political selfishness. Now, for once, we have an enduring monument worthy of our material prosperity and progress of our people. The library is a place for which, with us, the opportunity is still far too meager. We have had no public buildings have been the deplorable issues of inexperience and political selfishness. Now, for once, we have an enduring monument worthy of our material prosperity and progress of our people. The library is a place for which, with us, the opportunity is still far too meager. We have had no public buildings have been the deplorable issues of inexperience and political selfishness. Now, for once, we have an enduring monument worthy of our material prosperity and progress of our people.

His Price a Difficulty.

"Every man has his price," contentiously announced the philosopher of the all night drug store, where the street railroad franchise was being discussed.

"Well," said the wit of the establishment, "if which would you would discover the price and offer it to me."

"My boy," solemnly remarked the perfumery drummer, who had not spoken before that evening, "there is no smaller coin made than a cent."

For several seconds there was no sound heard save the drip, drip of the real mineral waters from the hydrant. —Buffalo Express.

Wanted It Out.

An old highland sergeant in one of the Scottish regiments was going his rounds one night to see that all the lights were out in the barrack rooms. Coming to a room where he thought he saw a light shining, he roared out, "Put out that light there!"

Out with the light, he shouted back, "It's the moon, sergeant!"

Not hearing very well, the sergeant cried in return: "I think care a tucket what it is! Put it out!" —Scottman.

Not Worth a Wife.

The missing bridegroom is getting numerous. The latest one's absence from the wedding ceremony is said to have been due to his excessive bashfulness. A man who is too modest to attend his own wedding doesn't deserve a wife, and he isn't likely to get one. —Boston Herald.

Frank Scott is recovering from a severe spell of sickness.

Scott's Emulsion

is, above all other things, the remedy for sickly, wasted children. It nourishes and builds them up when ordinary foods absolutely fail.

See and \$1.00 at all druggists.

Europe's Most Famous Artistic. Within the scope of a magazine article it is impossible to describe the steps which France, Germany and Italy severally took. A sufficient idea, however, may be gained by the casual reader that what has been done when I say that within the last ten years France has acquired of equatorial Africa about 800,000 square miles, Germany, 400,000 square miles; Italy, 647,000 square miles; and Portugal has now a defined territory extending over 710,000 square miles. France, moreover, has been active further north, in the Sahara and in west Africa, and claims rights over 1,000,000 square miles, while Germany, in southwest Africa and the Cameroons, asserts her rights over 540,000 square miles. —Henry M. Stanley in Century.

Asbestos in Boots. The invention consists of a preparation of asbestos wool compressed into thin sheets by hydraulic pressure. These sheets are then waterproofed on one side by a special solution, and portions inserted into the boots at midsole sole. Asbestos being a nonconductor of heat, its interposition into the fabric of our boots and shoes in conjunction with a waterproof material has the effect of counteracting the influences of heat, cold and moisture. Asbestos lined boots cannot crack in wear, and are, besides, many times more flexible than boots made in the ordinary manner. Lastly, asbestos being a nonconductor of electricity, persons wearing boots thus made may walk over live electric wires in perfect safety. —Public Opinion.

Lighted Cigars on the Elevated.

"Perhaps it would be best to expect the elevated road to enforce its rule prohibiting the carrying of lighted cigars on the cars," said Mr. Biffington, "but we must do to amend that rule so as to make it prohibit the carrying of lighted cigars and then enforce it? It would be a difficult thing to do, I know; the man who stood on the platform to prevent the carrying around of lighted 'tobacco' would need to be not only a connoisseur in tobacco, but an athlete, too, and even then he might make mistakes in the way of the other, but it would be an effort in the right direction." —New York Sun.

According to Ovid, the white swan came from the tears Venus shed for Adonis.

Joy's for the Jaded and Good Health for All Mankind.

JOY'S VEGETABLE SARRAPARILLA.

Is made from herbs and contains no alcohol. It is a perfect blood purifier, and cures all skin diseases, such as eczema, psoriasis, and leprosy. It is also a powerful laxative, and cures all constipation. It is a perfect tonic, and cures all weakness and debility. It is a perfect cure for all diseases of the blood, and is the only medicine that can be taken with safety by all persons, including the most delicate and the most robust.
